To Whom It May Concern,

Re:
DOB:

I, Dr _____, can confirm that (name) has an enduring mental illness and has a diagnosis of _____.

(name) has been receiving appropriate pharmacological treatment however, their condition is permanent. Notwithstanding the potentially specific nature of their condition, substantial functional gains are not expected due to the severity of their illness. This is further detailed in the medical reports.

There are no further treatments likely to remedy or improve these impairments and they will require ongoing specialist treatment with community support services (if/when).

They will require lifetime support from NDIS.

Yours sincerely

Dr _____
